

Wayerz – A Better Route to Interbank Wiring

Global Interbank Wiring: Slow, Expensive, Outdated

Of the hundreds of millions of international wires performed daily, most are routed randomly or based on short-term factors, and about 30% are non-automated/only partly automated. Cost of Transfer escalates, quality of service suffers, and banks are unable to monitor total wiring costs.

Wayerz: Rationalizing the Process

Wayerz is an integrated digital platform that lets banks select the best route for each wire, based on wiring **COST**, **TIME**, and **OTHER FACTORS** (preferred provider, benefits, blacklists, restricted jurisdictions, etc.)

Useful Features

- **OPTIMIZE** aggregate costs and times, and track your total performance with **IN-DEPTH REPORTS**
- Our **CUSTOMER INTERFACE** lets your clients manage beneficiaries, provide instructions, and review specific wires and routes
- A special module for **ADVANCED BILLING**
- Collect **ANONYMOUS STATISTICS** for best-practice analysis
- Integrate the system **IN-HOUSE** or in **YOUR CLIENT'S SYSTEM**

Why It's Good For You

- Fully **DIGITALIZED**, encrypted and **SECURE**
- Accurate and **RELIABLE**
- **MINIMIZES** non-STP procedures
- Improves **SERVICE QUALITY** and **REDUCES COST OF TRANSFER** for both client and bank
- Boosts **LIQUIDITY** and generates **NEW REVENUE** streams
- Banks communicate on a **SINGLE PLATFORM**

About us

Our team of banking services innovators is made of top entrepreneurs, international banking experts, and cool tech gurus.
